

## Electional Toolkit

By Alphee Lavoie, Ncgr Level IV, counseling & rectification

Electional astrology is a must have skill for most counseling professional astrologers. However, the most difficult aspect when working on an electional chart is to find the days when there are positive aspects in the sky. One of the methods used by astrologers is to get a software program that will place a chart of the day on the screen and keep advancing one day at a time watching the aspects that are made. Another way is to flip through an ephemeris and try to pick up days when there are a lot of good aspects. In all truth, it doesn't matter what method you use to find good days to set up an electional chart ... it is still a lot of work! With our Star Trax Millennium software program we have a special module exclusively to show days with grand trines, kites, mystical rectangles, Grand squares, T-squares and other astrological patterns.

Now I've just finished creating a brand new module called Electional Graphs. With these graphs it is even easier to see the patterns at a glance and choose the best days to set up an electional chart. You'll find this method to be an extreme helpful aid for this kind of work.

Double Click on this URL to watch the videos:

While you are in this website you might want to read some of my articles about special discoveries that I made related to special astrological techniques. You may particularly enjoy the ones about my discovery of using Parallax with the New Moon and Dirunals on the Astro map to predict mundane events around the world. There are also many articles on horary and other topics that you will find there.

If you are interested you can also watch hundreds of short videos on our cutting-edge astrology software programs. Just watch a few and I think you'll be impressed by all the innovative and functional features that they offer. We have over 30 pieces of AIR astrological software program. Our programs really are ingenious and make your work as an astrologer much easier and accurate.

Just click here to view the software videos:
