

AIR's Online Astrology Services

Alphee Lavoie and Sergey Tarassov

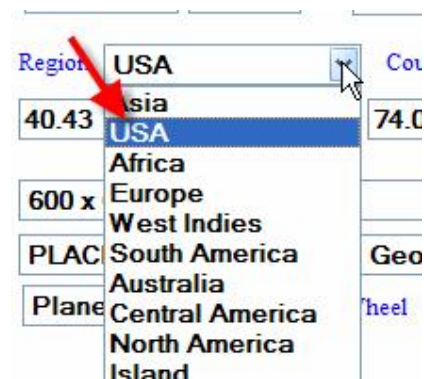

Calculate your Natal Chart

This service will calculate your natal chart very easily and quickly. Begin by entering your birth data.

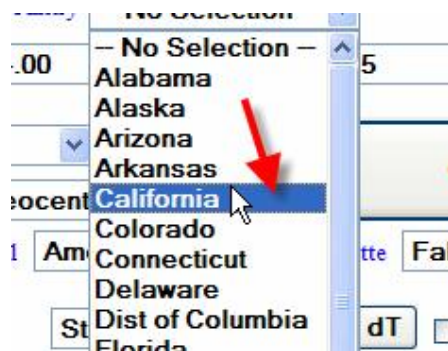

Type in your *LOCAL* time of birth.

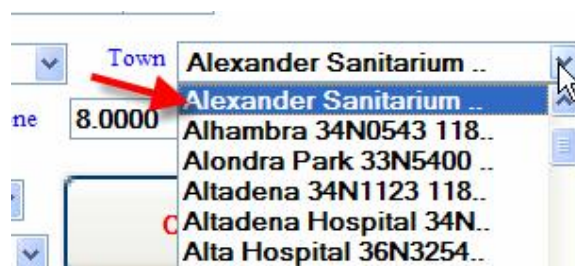

Now choose the country/region of your birth:

Then the state

and the city or town

Now the latitude and longitudinal coordinates and time zone for your birth place will be automatically set.

Region USA Country California Town Alexander
37.3057 N deg.min 122.1651 W Time Zone 8.0000 W

We ask that you enter your birth data first and then enter your birth place, otherwise your time zone will not be correct and your chart will be inaccurate.

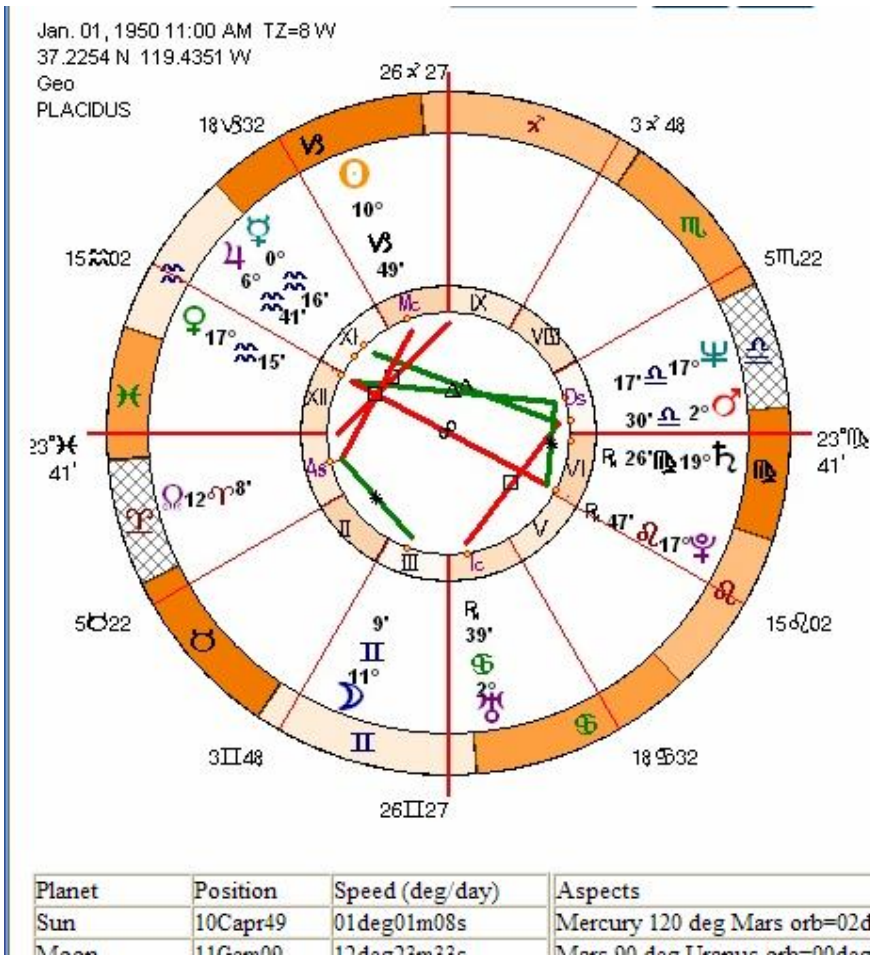

Next, please choose the zodiac (11 options), image size, orb, house system, design options (wheel type, palette) and astronomical option (parallax):

37.3057 N deg.min 122.1651 W Time Zone 8.0000 W
600 x 600 Geo Orb=3 deg Calculate
PLACIDUS Geocentric (no parallax)
Planets+House Wheel American Palette Fall
Step=1 d +dT -dT to Print

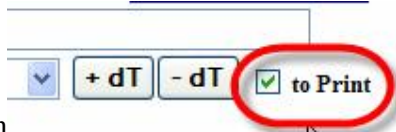

If you do not click any options here your chart will automatically default to the settings that are used by most western astrologers. More advanced users can calculate their chart in heliocentric or declination longitude., etc.

Geo
Geo Lat
R Asc
Declination
Helio
Siderial (Fagan)
Draconic
In Mundo
Decl. Long.
Planetary Phases
Helio Lat.

The result of this input will look something like this:

To remove all controls from the screen (keeping the wheel and table only) check this

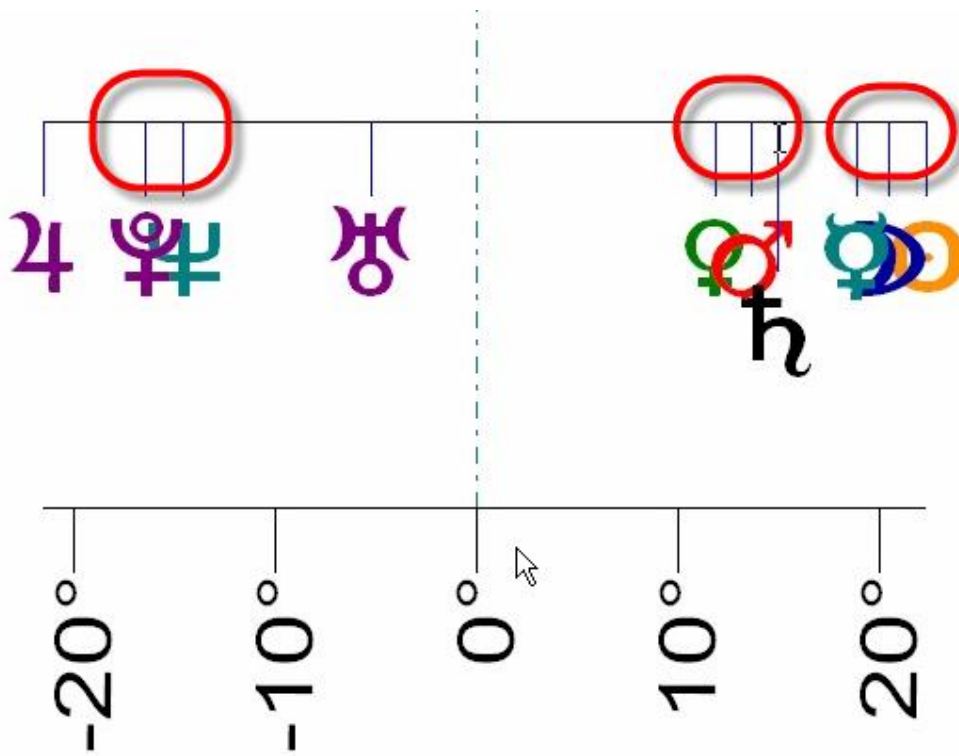

option

You even can vary the birth time by clicking these buttons

to:

If you choose a declination chart (do not mix with declination longitude) the chart will look like this:

This shows you how far the planets incline to the Equator. As you see in this particular case there are three clusters of planets that have the same declination.
