

AIR's Online Astrology Services

Alphee Lavoie and Sergey Tarassov

Right Decision

This is the most advanced service that we offer. It is also one of the most ambitious and successful projects of AIR Software. The Right Decision consists of two artificial intelligence modules:

- 1) It understands your question when you type it in English and uses intricate horary techniques to answer your question.
- 2) The other module will find the very best time for you to initiate your stated action.

The screenshot shows a web form for the 'Right Decision' service. It features a clock icon next to the date and time input fields, which are set to 2007, Jul, 9, and 6:06. Below this are icons for a globe and a birth chart, each with a 'Click here' button. A question input field contains the text 'Should I buy a car'. At the bottom, there are three buttons: 'Calculate my Answer', 'Clear', and 'Find Best Time ... Calculate Chart'.

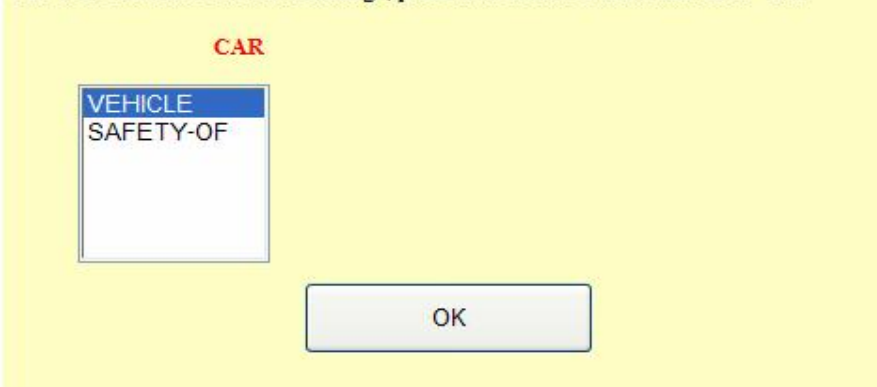

Click the “Calculate my Answer” button.

This concept of astrology works with the time that the question was asked. It is very important that you either use the present time or the day and time and place where you first thought of the question when you are entering the date and time for the question.

After entering the date, time and place of the question you must type your question in an English sentence. You do not need to use capital letters or any punctuation at all. And it is best to state your question simply.

If any word in your question has multiple meanings the Right Decision program will ask you to clarify the exact meaning by offering you choices to choose from:

The word CAR has several meanings, please chose one of them and click "OK"

Click on the correct meaning of the word for your sentence and then click OK. Your answer will appear (as the sample below) and either be GREEN for YES or RED for NO.

General: YES (18%)

This above answer indicates that in general the situation is 18% YES, i.e. a bit positive. The greater the percentage, the stronger the answer. The same rule applies to a RED NO answer.

Finding the best time module

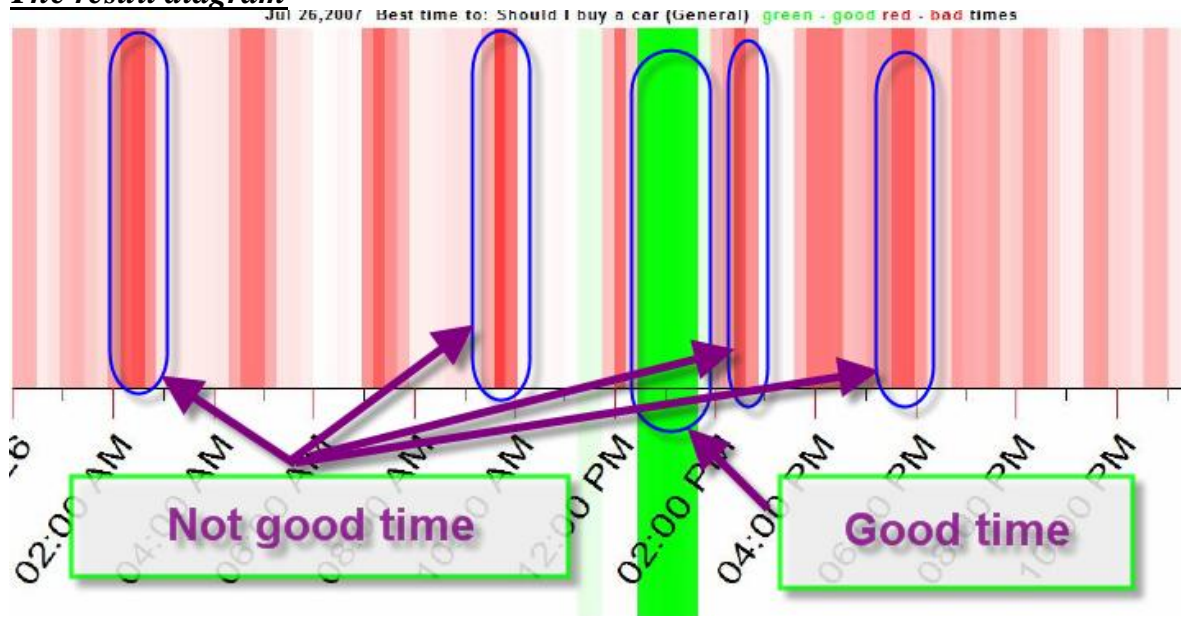

First enter your birth information including date, time and place. If you don't know your birth information click on the '**I don't know my exact birth time**' button.

Next enter the action that you want to take, such as I want to make a call, I want to visit my mother, I want to go on a job interview, etc.

Now, click on the '**find the best time**' button.

The result diagram

The Red areas indicate that those times are not good for the action. The Green area is excellent to take action. The stronger the color the stronger action indicated or not depending if the area is red or green.
