

# **A NEW FUTURISTIC VIEW OF ASTROLOGICAL RESEARCH**

**By Alphee Lavoie, Ncgr Level IV**

Wouldn't it be wonderful if in just seconds, a parent or a teacher could find the right career potential for any child? With serious work astrologers can make this possible. It is this type of service if made available to the everyday person that could help change the world by offering the much needed clarity for career choice. This would take the guesswork out of the common dilemma of "What am I going to do when I grow up".

Today we have all the tools to make this possible. Air Software's Astro Investigators Research Program has all modules to research every profession. The powerful NeuralNet mathematics creates an artificial intelligence to give weights to thousands of Astronomical/Astrological criteria that has a high probability for each profession. The program uses various statistical mathematics to arrive at strong and weak criteria in comparison with the control group.

Depending on the strength or weakness of these criteria, the program assigns each one a weight value. In this system, we use standard Astrological techniques but also go far beyond that. We test criteria such as planetary phases, aspect between planetary phases, planetary speed and acceleration, all types of planetary pictures and much more.

We took thousands of charts of scientists, musicians, actors, military people, teachers, and sportsmen and ran them through the research program and then the NeuralNet module to create special artificial models. Once these models are made, an entire file of natal charts can be compared with each of these models and weighed accordingly. This is a wonderful feature that lends itself to so many areas of research. For a career focus we could take thousands of natal charts of youngsters and see which profession each child would be best suited for according to the natal chart. Our goal is to create hundreds of these NeuralNet models for many professions.

The biggest problem that we have in astrological research is getting accurate birth times...just the birth date and location are not good enough. Gathering the

data for the correct birth time is not an easy job. According to a survey, there are millions of people who believe in astrology and tens of thousands that calls themselves astrologers. If we can convince all these people to send us birth data with the day, time and place of birth for people they know and the profession that they have chosen we could we could set up a fantastic database to research.

### EXAMPLE OF OUR RESEARCH

Here's how well the system works. We used thousands of natal charts of actors, musicians, athletes in various sports, military persons, teachers and scientists. We used our research program to measure the strength of hundreds of astrological criteria and then sent the results to the neural net module to create an artificial intelligence model for that profession. The following graph is for natal charts of actors that I sent through the artificial intelligence in three different professions: acting, music and sports. I purposely chose actors who are also singers to show where their talents lie. Is their talent that of a singer or actor or a sport person? The longer the bar graph the more talent the individual has in that profession.

The next graph is based on people in sports. Notice that even though a sports person can be assertive they would not be good military people. Look at the three boxers.

The following graph is about musicians.

Person	MILITARY	MUSICIAN	teacher
Bach Johannes	Don't Know Yes	Don't Know Yes	Don't Know
Mozart	Don't Know Yes	Don't Know Yes	Don't Know
Albert Herb	Don't Know Yes	Don't Know Yes	Don't Know

The following graph is about scientists. All of them show talent in science but also as teachers.

Person	MILITARY	Scientist	teacher
Albert Einstein	Don't Know Yes	Don't Know Yes	Don't Know
J. Kepler	Don't Know Yes	Don't Know Yes	Don't Know
Sagan Carl	Don't Know Yes	Don't Know Yes	Don't Know

The following graph is related people in the Military. NOTICE that Hitler is a better actor than a Military person.

Person	Actor	MILITARY	Scientist
Grant Ulysses	Don't Know Yes	Don't Know Yes	Don't Know
Hitler	Don't Know Yes	Don't Know Yes	Don't Know
Patton George	Don't Know Yes	Don't Know Yes	Don't Know
Mac Arthur Douglas	Don't Know Yes	Don't Know Yes	Don't Know

In 1972 we had the blue laws changed in Connecticut. The blue laws read “if you do psychic work, tarot, astrology or psychology work you will be fined \$20,000 and spend 20 years in jail”. We were able to take astrology and psychology off the blue law books.

Imagine that psychology was in the same illegal category of blue laws as astrology. The psychologists were able to organize themselves and work together to become internationally accepted. But what happened to the astrologers?

Astrology is one of the oldest professions in the realm of Occult arts. Instead of being accepted by the masses we are laughed at and not taken seriously. Why? We haven't done anything to prove its validity. I think after thousands of years it's about time that we take astrology out of the field of entertainment and put it onto the map into mainstream society. But for that we need to join hands and work together.

I think that it's time that we all work together to prove to everyone on the planet that astrology is a real scientific tool and can be used constructively in so many ways to enhance everyone's life.

I did some work on this project and have proven that it works.

Here's how well the techniques work. I did a research using 2400 musicians and created a neural net model for it. I did not include two of my gators both of whom are excellent musicians. Peter gives concerts all over the world and teaches music at very prestigious Wesleyan University in Connecticut.

Our other musical gator is Franco who has his own band for years and plays music coast to coast. When I ran both their charts through the artificial intelligence model for musicians the results clearly indicated that both have tremendous talent in music.

	<b>NO</b>	<b>YES</b>
Person	music315	
	+2/-0	
Franco	Not	Don't Know Yes
Peter	Not	Don't Know Yes

Astrologers, the time is here now. We've been dismissed long enough. Let's work together to collect the data. I'm sure that my astrology research group, 'the gators', will be more than happy to put their shoulders to the task to research and create models for thousands of different professions.

*What an asset that would be to everybody on the planet and especially for parents to help them pick their child's future .*

Then we will set up a free website that every parent, teacher or anybody seeking career guidance can rely on to offer the insight and guidance they need. By simply in putting their birth data and having the program compare it with hundreds of professions the public can discover their foremost innate talents that they can develop further for success.

A project like this can lift astrology to the highest star in the eye of public credibility.
